GUN SAILS

WELCOME

Gun Sails goes the direct way – for more than 25 years.

Thanks to our direct selling system we are able to offer you the best out of the windsurfing world at significantly more favourable prices.
Our passion for the windsurfing sport, the constant and ongoing development of our products and our long-term experience has made Gun Sails to a leading brand in the windsurfing business over the years.
Plenty of top results from the trade press is proof of this.
But our advantage is not only the price. From the first idea to the finished product, we steer all processes by ourselves, therefore we can revert to comprehensive product knowledge.
Our service team will offer an individual advice to enable you to find the equipment that perfectly suits you. You are in a direct contact to the brand and benefit from the "short ways", this applies for advice, ordering and also after sales service.

Have fun on the water

Your Gun Sails Team

SERVICE

ORDERING QUICK AND EASY

Tel: +49 (0) 6893 80110
Fax: +49 (0) 6893 70628
You can reach us personally from Monday to Friday, 09.00 to 18.00, otherwise just leave a message on our answering machine.
Or very fast and simple: WWW.GUNSAILS.DE
E-Mail: service@gunsails.de

For UK + Ireland: Personal advice available from 07.30 to 16.00, Monday to Saturday.
Hotline: 0208 715 0040
www.gunsails.co.uk or mail to:
info@gunsails.co.uk
UK + Ireland fax orders: 0208 395 8595

EASY PAYMENT

We accept **VISA** and **Mastercard**.
Within certain European countries, it is also possible to pay via cash on delivery.
For further details, please contact our office.

INFORMATION SERVICE

Should it occur that one of your ordered articles is not in stock at present due to a great demand, we will inform you about the delay by email or telephone.

DELIVERY WITHOUT RISK

Have you placed your orders in our headquarters in Germany, your articles will be dispatched by UPS. For freight charges, please have a look at our homepage www.gunsails.de or e-mail us at service@gunsails.de

UK + Ireland customers e-mail at info@gunsails.co.uk

24 H DELIVERY SERVICE

If you order with a German delivery address, we can offer a 24 hours delivery service.
We are sorry but for deliveries abroad, we are not able to do Express shipments.

EXCHANGE SERVICE

Of course you can exchange or return articles within 14 days. Just contact our head office.

GUARANTEE OF QUALITY

All Gun Sails products are subject to a strict quality control. Sails and masts carry a 24 month warranty, all other articles carry a 12 month warranty.

NEW WEBSITE

YOUR DIRECT WAY TO A NEW SAIL

The new online shop offers more product pictures, more product information and more comparisons than before. Here you can comfortably choose your new sail or equipment, without any stress and shop opening hours, around the clock.
You can find more details and pictures for most products online than here in our catalogue and with a simple click on the shopping cart, you can make your order. You will be informed by E-mail about the current status of your order including information about your tracking number with which you can trace your parcel online.

ALWAYS UP TO DATE

GUN SAILS TODAY

Our newsletter Gun Sails Today is released every 5-6 weeks. Here, you will be the first to know about new products, test events, special sales promotion and much more.
Some of our special offers are exclusively for our newsletter subscribers, it's worth subscribing to it, of course free of charge, and sure you could unsubscribe from it at any time.

NICEPRICE

The special section for grabbing a bargain. Regardless whether you look for test sails, exhibition models or discontinued goods, definitely you will make a good deal there. The Nice Price section is mostly updated daily, so it's worth to check the site regularly.

NEWS

News about products, test events, insider stories, reports from our team riders, with just one click to our news section you are always up-to-date.

TESTS

What is the international trade press writing about Gun Sails products? Here you will find current test reports as well as the ones of the last years in order to get an impression.

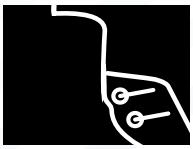
SAIL FEATURES

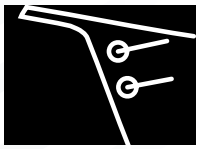
Sail designer Renato Morlotti is the is the man behind the success of our sails.
His attention to detail and passion for perfection are legendary and the guarantee for you to have a first class windsurfing sail. But Renato is not only focused on the sail performance; longevity and usability are just as important to him.
Numerous test results in the trade press confirm the outstanding quality of workmanship and equipment of our products and prove that great sails don't have to be expensive these days.

MINI BATTENS

Lightweight mini battens take control of the leech while twisting and avoid detrimental leech flutter. In this way, the window fabrics are spared and the longevity of the sail is predefined.



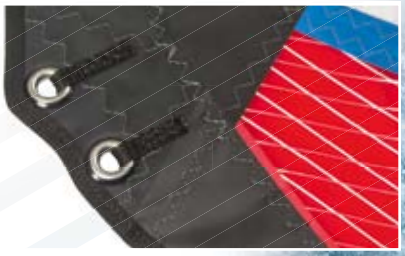
RBL Design from Aqua to Stream



RBL Design from Rapid to GS-R

RBL

The Reduced Boom Length design shortens the boom length.
The handling is much easier and feels more compact. The sail control is significantly improved. A shorter boom is generally stiffer and will assist in maintaining the sail stability and profile.

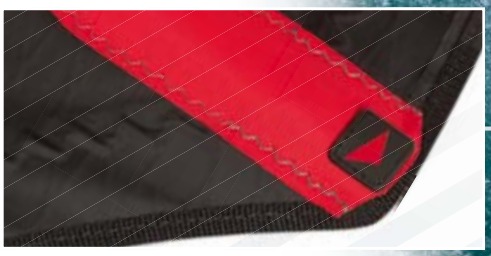


OFFSET CLEW

The Wave sails are equipped with 2 clew eyelets which are set asymmetrically for individual tuning.
▲ Upper eyelet for more power
▲ Lower eyelet for more control

ITB

The Internal Trim Batten system is completely integrated into the batten pocket and the battens can stay tensioned in the sail.
The profiled end piece offers additional protection against abrasion.



BATTEN GUARD

PVC tabs on the upper batten pockets prevent wearing out and abrasion whilst rigging.

POCKET GUARD

A PVC braid, sewed on the bottom batten pocket, protects your sail from abrasion while uphauling and waterstarting.

FOOT GUARD

All seams in the significantly stressed foot area are protected by Dacron coverings.
A PVC edging from foot to the first batten protects the leech edge against your board's nonslip coating.

COMFORT PULLEY

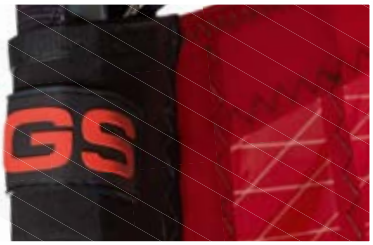
The integrated triple pulley has large easy turning stainless brass rolls which greatly reduce the effort required for sail trimming. Also, if you prefer, the rolls are removable to allow the use of standard downhaul pulley hooks.

VARIO TOP

The top opening is enlarged for an easier mast insertion. The adjustment buckle is placed behind the mast; unnecessary webbing can be stowed in the top opening.

TOP PATCH

An additional sewed on top patch avoids wrinkles while rolling the sail up.



TOP GUARD

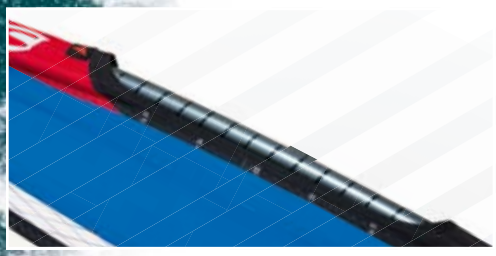
The large reinforcement at the sail top avoids abrasion and wearing out whilst rigging.

Fast Rigging Easy Doing

FRED will help you to find the optimal luff trim for your sail. The mark is found in the upper sail window and serves as an orientation point to create the perfect luff tension (loose leech).

SLEEVE GUARD

The mast sleeve of all camless sails is reinforced in the batten area in order to avoid abrasion.

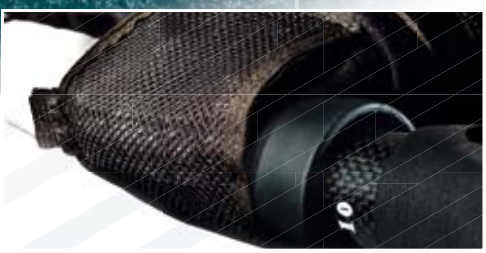


BOOM POSITION CONTROL

The printed height scale at the boom opening helps you to easily remember your personal boom position.

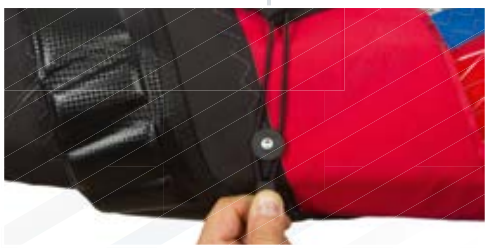
SLEEVE VOLUMER

The Gun Sails logo that is sewn on the sleeve keeps it open at the boom opening area like a clip and thus mast insertion is much easier.



MESH POCKET

On the inside of the protector you will find a closable mesh pocket which can hold e.g. your downhaul surplus.



STRAP ON

For very easy packing away and storage:
Just roll the sail up and fix the elastic retainer.

MAST FOOT PROTECTOR

The large mast foot protector can be pulled back whilst rigging. The loop eases the initial pulling down of the sail.
The uphaul can be comfortably inserted through an opening in the protector.

WAVE & CROSSOVER SAILS

From innovative 3-batten wave sail for radical wave rides up to an easy to handle allrounder for all wind and water conditions, here you will find 6 different models and altogether 44 sizes, designed for your personal style and your preferences. No matter on which spot, no matter for which conditions.
With the performance chart, you can see a basic overview about the specific characteristics of the individual sails.

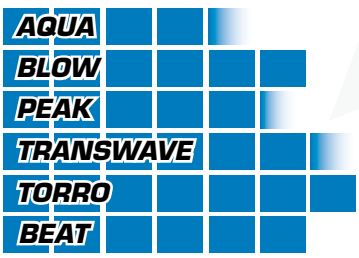
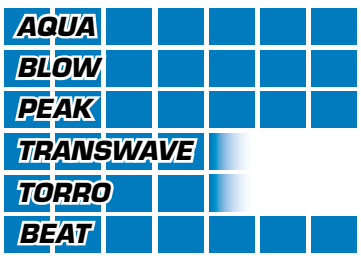
HANDLING

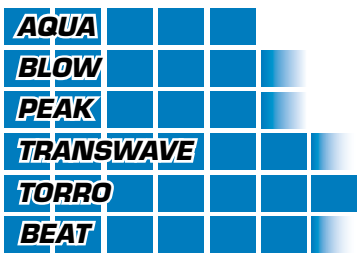
PROPULSION POWER



X-PLY



SPEED



WWW.GUNSAILS.DE

FLO JUNG

" Lively, light as a feather and with a unique acceleration, the 3-batten concept provides a completely new feeling in wave riding. It is nearly like surfing, you only feel the sail when you need it. "

AQUA NEW

3-BATTEN WAVE

The 3-batten wave sail from Gun Sails. "Not only a trend" explains our sail designer Renato Morlotti. So what to expect with the new Aqua?
A perfect handling sail, super light in hands, absolutely neutral and which becomes virtually invisible in waves. Despite the great neutrality, the profile of the new Aqua produces enough momentum to guarantee good jump speed at the wave crest. The centre of effort stays stable even when the wind picks up, the Aqua never gets nervous and can be steered without any problem.
The Aqua is the only wave sail in our range that was designed exclusively for the use with RDM masts.
For all sailors looking for that ultimate kick while sailing down-the-line or who just prefer an extremely light and agile wave sail can become a trendsetter with the Aqua and try out a new kind of wave riding.

PROGRAMME

GUN SAILS

BLOW

4-BATTEN COMPACT WAVE

Pieter Bijl | BLOW

The Blow is our lightweight, 4-batten compact wave sail. Compact means a shorter luff with slightly longer boom, thus the Blow is powerful and reacts yet neutral when needed.
It is a real allround handling weapon for each wave.
With its great stability of profile it covers a very wide wind range. Thanks to its general stability, the amazing drive and the outstanding planing abilities you will have great fun with the Blow also in bump and jump conditions. With a slight pull on the back hand you can easily accelerate and get out of tricky situations.
Riders who look for wave action in more sideshore-oriented spots and prefer a softer feeling with an even more distinctive on/off should also have a look at our Peak.
The Peak has a bit less pull than the Blow and is more designed for wave riding.

PIETER BIJL

"A really light feeling whilst sailing. I like the power as it is immediately there when pulling the boom and you get momentum again."

PROGRAMME

WAVE | POWERWAVE | FREESTYLE

KEY FACTS

- Reduced weight 4 batten wave sail
- Short compact outline for more control and radical manoeuvers
- Offset clew: Two asymmetrically set clew eyelets for individual trim
- 100% x-ply construction for maximum demands

Maria Andres | **PEAK**
4 BATTENS

MARCOS PEREZ

"I especially like the hardcore workmanship. At my home spot Gran Canaria, you often get washed from the waves and you land on stones. It is a big advantage when your equipment is not that sensitive to rough use."

FROM
365 €

PEAK
RADICAL WAVE

The radical wave sail Peak is designed as a 4-batten sail up to size 4.7, from 5.0 on it has 5 battens. In comparison to our compact wave sail Blow the outline is more drawn-out and the boom length is shortened. With this feature it appears softer with a tiny bit less tension on the back hand.
The wide Dacron mast panel loads immediately and provides the sail with a comfortably absorbed feeling. At the same time the Dacron mast panel improves the on/off abilities of the sail.
Even in rough conditions the sail stays controllable with just one trim and is thus perfectly suitable for the use in strongest winds. The Peak offers a balanced performance and can be used in all kind of wave spots; compared to the Blow it has a bit more side shore abilities.

PROGRAMME

WAVE | POWERWAVE | FREESTYLE

KEY FACTS

- Perfect on/off for fast response and radical wave rides
- Wide Dacron mast panel for better gust control and comfort

TRANSWAVE

POWER WAVE

The sail with that thrill.
Riders who want to have a powerful wave sail with a wide wind range and precise control cannot get past the TRANSWAVE. Compared to the Blow and the Peak, the TRANSWAVE has a deeper profile and a constant basic draught, a real advantage for powerful turns and an amazing lift in jumps. The Dacron luff panel provides the sail with a smooth and comfortable feeling without losing any performance or its sporty character. The Transwave will enthuse you as a powerful wave sail which is easy to control and offers superb planing abilities whilst covering an immensely wide range of use, from wave to flat water freemove blasting.

PROGRAMME

WAVE | POWERWAVE | FREESTYLE

KEY FACTS

- Deeper profile for early planing power
- Wide range of use from wave to freestyle
- Dacron Panel increases the comfort in strong gusts
- Offset clew: Two asymmetrically set clew eyelets for individual fine tuning

TORRO

ALL TERRAIN FREEMOVE

RENATO MORLOTTI

" Imagine you are given a windsurf trip but you do not know where you are heading? So which sail should you take with you? I would choose the Torro, so I'd be prepared for everything."

Combining three into one – no matter if freeriding, freestyling or wave riding, the Torro is without any doubt that ultimate freemove sail. A top allround sail with multidisciplinary range of use.
Due to its versatility, the Torro is virtually the right choice for each windsurfer on every spot. Excellent early planing, outstanding maneuverability, amazing speed resources: these are the main characteristics which are constantly praised by the trade press. The sail's weight was already reduced last season with the use of Kevlar Warp laminate in the stressed zones, which remarkably results in an even better handling.
A further advantage is that the Torro only needs just one setting which gives you an immense wide range of use so you can just concentrate on your pure windsurfing fun.
Its versatility, the solid workmanship and construction and the attractive price are obviously the main reasons why the TORRO still is our absolute bestseller.

PROGRAMME

Valentin Böckler | BEAT

VALENTIN BÖCKLER

"It is incredible how easily the sail rotates around its own axis and how fast the profile re-loads when sheeting in. For pure freestyling, I recommend the RDM only"

BEAT

FREESTYLE

The Beat achieved its breakthrough as a light freestyle sail already in 2014 due to its radical diet. The complete upper area of the sail was constructed with light Square-Ply material and it was also equipped with the new Kevlar Warp Laminate in the stressed zones and in the leech. Now sail designer Renato Morlotti has made some more fine tuning and the reward is the full score in the category freestyle and the plus "freestyle allrounder" in the test conducted by Geman "surf" magazine (10/2014). An improvement is the leech which is now more tight and with less loose leech so that the sail is much more controllable and quiet in all duck moves. Thanks to the compact measurements of the Beat, your moves can be done even more precise. With the 2015 model you got a super light, super agile freestyle sail in your hands with which every trick and every move will work out as easy as never before. The outstanding workmanship and the excellent performance -typical for Gun Sails – make the sail also interesting for freeriders.

PROGRAMME

FLATWATER SAILS

Whether inland lake or open sea, here are our planing weapons for quieter waters. You can choose from camless sails such as Stream and Rapid or camber sails like the Sunray, Vector and GS-R. Within these two groups you can go for the "freeride" variant whereas that means the easygoing cruising with more handling comfort, or the sporty race variant that focuses more on performance and speed. The sails Stream and Sunray belong to the freeride group, and the Rapid, Vector and GS-R are classified into the race category.

STREAM

NEW

NO CAM FREERIDE

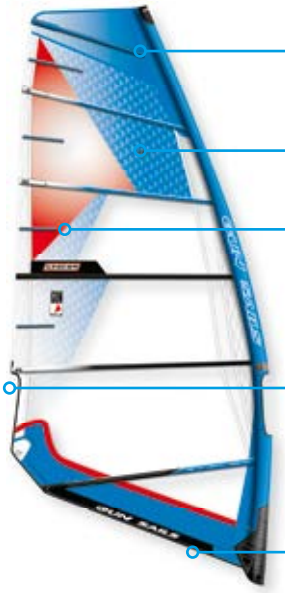
The Stream is our new camless freeride sail for amazing planing sessions. It replaces the Future and comes up with a new outline as 5+1 batten sail. Plus 1, because the upper batten is only a thin 6mm rod in a slim batten pocket which stabilizes the sail top. The 2 smallest sail sizes get along with 4+1 battens. Due to this change, the Stream is lighter and can be handled easier than its forerunner Future. Regarding the sailing characteristics there are no changes. The Stream is perfectly early planing, accelerates to an immense top speed and feels well-balanced in the hands. It combines sporty performance with uncomplicated sailing characteristics and offers easy handling in all situations. Just sheet in and blast away. Up to and including size 6.9 the Stream can be used with an RDM mast and offers with that an even easier handling with remaining performance.

PROGRAMME

FREEMOVE | FREERIDE | FREERACE

KEY FACTS

- Classic freeride sail for each age and skill levels
- Easy rigging thanks to moderate mast curve
- Shortened outhaul for better control and easy handling
- Slim mast sleeve for easy uphaul and waterstarting
- Solid built sail frame of x-ply



4+1 or 5+1 batten concept, depending on sail size and range of use

RAPID

NO CAM FREERACE

Alex Vargas | RAPID

The Rapid is a super fast camless freerace sail with a huge range of use with one trim only.
The Rapid captivates with excellent early planing, high acceleration and an amazing top speed.
The only characteristics it has in common with its camless related sail Stream are the easy handling and the immense wide range of use. As the Rapid is a sporty freerace sail with compact and direct feeling and a maximum of planing performance. It can accelerate even in limits whereas it nevertheless keeps its stability thanks to the stiff batten frame.
This designed in stability combined with the high speed will get you easily through the wind holes.
An efficient engine for all sailors who are keen on speed and pure sailing fun.
Those who prefer an easier handling can use up to size 6.7 a high percentage RDM mast without losing performance.

ALEX VARGAS

"An amazing sail for speed blasting. I had never thought that you could accelerate like this without cambers. The sail has such a performance and control, for me absolutely awesome."

PROGRAMME

FREERIDE | FREERACE | SLALOM

KEY FACTS

- Camless freerace sail with freeride handling characteristics
- 7/4 cross batten concept for maximum profile stability and better aerodynamics
- Easy handling thanks to reduced boom length (RBL)
- 2 clew eyelets for individual tuning
- Solid built sail frame of x-ply

Slalom outline for top performance

Slim mast sleeve for easy sailing and rigging

Cross batten concept with 4 tubes for stability of profile

RBL: shorter boom for compact handling and maneuverability

Comfort pulley with easy turning rolls, reduces the rigging forces

FROM
399 €

PHILIPPE VIGNERON

"We worked on the Sunray as long as it was necessary in order to get the right balance of power development and freeride feeling. And the commitment was worth it, I can recommend the Sunray to every freerider who likes to feel that moment of power in lower winds."

FROM
405 €

SUNRAY

2 CAM POWER FREERIDE

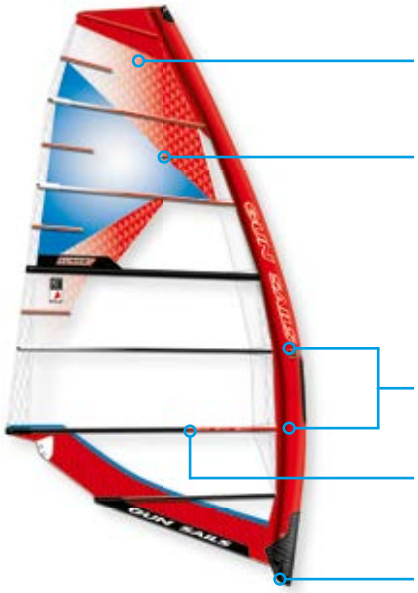
Our 2 cam freerider Sunray amazes with powerful early planing, incredible top end speed and maximum control to the limits. Two cambers provide the profile with a lot of power already in lower winds and stabilize the sail when the wind will pick up. The Sunray speeds away from the beginning on and offers an unstoppable acceleration. When sailing straight, the sail is like locked in and gets going almost by itself, whereas strong gusts will be absorbed smoothly by the distinctive twist. Rigging the Sunray is an easy matter thanks to the intelligently constructed cambers. With a soft pressure they roll gently onto the mast, just the same they rotate in maneuvers. In comparison with the Vector, the Sunray has a slimmer mast sleeve what results in a more comfortable handling and also the rigging forces are more moderate.
A sail for sporty freeriders as well as for comfort-orientated slalom riders.

PROGRAMME

FREERIDE | FREERACE | SLALOM

KEY FACTS

- 2 cam sail with excellent early planing characteristics
- Very stable centre of effort and top high end speed
- 6 plus 1 Cross batten concept for more control
- Shorter boom for compact handling (Reduced boom length)
- 2 clew eyelets for individual tuning



+1 mini tube for lighter and firmer sail top

FRED, helps to indicate the optimal luff tension

2 roll cams for early planing power in lower winds

Cross batten concept with 3 or 4 tubes for stability of profile

Comfort pulley with easy turning rollers, reduces the rigging friction

VECTOR

3 CAM FREERACE

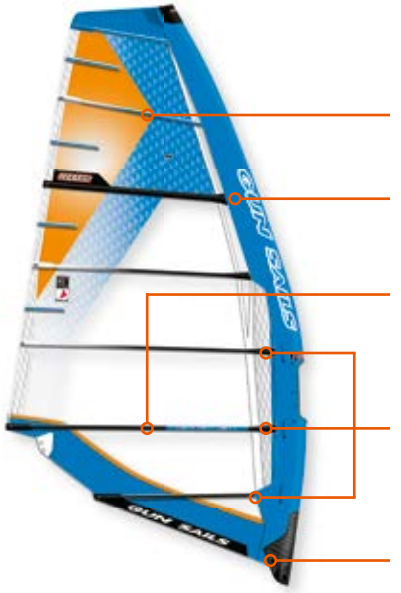
Pure freerace: Equipped with 3 roll cams, 7 battens, thereof 4 tubes and a double-sided profiled mast sleeve, the Vector will enthuse you with its outstanding early planing power, immense acceleration and its amazing high end speed.
The Vector is a powerful machine without any limits. The well-balanced profile keeps its shape whilst planing and provides easygoing and fatigue-free sailing over hours.
When setting the Vector you will appreciate the easy rigging, the 3 roll cams snap into place with the lightest of pressure, almost on their own.
Compared to the worldcup slalom sail GS-R, the Vector is easier and with less effort to sail and in lower winds, you will plane earlier than with the GS-R.
The Vector is a powerful freeracer for sporty and ambitious blasters and slalom pilots that love to compete in speed duels. Despite the loaded performance, the Vector is nevertheless easy to control and to handle.

PROGRAMME

FREERIDE | **FREERACE** | **SLALOM**

KEY FACTS

- 3 Cam freerace sail with excellent early planing skills and top control at high speed
- Aerodynamic profile for effortless and easy feeling
- 2 clew eyelets for individual tuning
- Compact feeling by reduced boom length (RBL)
- Tack strap for adjustment of foot tension



7/4 batten configuration for top speed and best control

Aerodynamically shaped mast sleeve

Cross batten concept with 4 tubes for maximum stability of profile

3 roll cams for deep profile with maximum torque

Zipper mast sleeve opening for easy setting of the cambers

Tack strap for adjustment of foot tension

GS-R

4 CAM SLALOM

Pieter Bijl | GS-R

JOSH ANGULO

" The GS-R has a tremendous speed potential, this is unquestioned and absolutely essential to be part of the group of top riders. What is even more fascinating for me on the new GS-R is its easy-to-use character that is not necessarily self-evident on such a high-tech sail."

The worldcup racing sail for performance oriented racers. You are looking for the challenge of competition? You like to compete with others? No matter if GPS racing, slalom races, long distance races or speed events, you definitely need a sail without compromises, with pure performance. The GS-R will be your reliable partner to go for ambitious goals and it stays controllable so that you can fully concentrate on your race track.
4 cambers, a wide, double-profiled mast sleeve, 5 tubes, 3 clew eyelets, a tack strap and a neoprene cover of the boom cut are the key features of our high end sail which is aimed to maximum performance and a really outstanding speed.

PROGRAMME

SPEED | SLALOM | FORMULA

KEY FACTS

DRAGON

THE NEXT GENERATION

COMPLETE RIG FROM 175 €

DRAGON

Light and stable, the Dragon is especially tailored for the young windsurf generation. Even rigging and handling are literally child's play, so the kids will have fun with this set from the start. The rig will be delivered as a "ready to sail" set. The trick is that the mast and boom are designed to allow the use with all Dragon sizes, so you just have to buy the next bigger sail when your child makes progress and gets older.

The set includes the sail, a two-part adjustable aluminium mast with mast foot, a vario quick lock boom with narrow tubes and an uphaul, all packed together in a transportation bag.

BURNER

The sail for newcomers and intermediates/advanced of all ages which make windsurfing a real fun sport. With this lightweight sail you can get your first planing experience, improve tacks and jibes or just enjoy windsurfing. A high x-ply portion and solid edge protections are key features of our BURNER thus it resists crashes and guarantees longevity. In combination with the fitting components you will enter the world of windsurfing with ease and improving was never that easy.
Enjoy easy sailing from the beginning on. So what are you waiting for?

The BURNER can also be supplied as a complete rig with matching mast and boom. The mast foot is not included into the set and has to be ordered separately.

A.C.E.S. CONCEPT

With the Gun Sails A.C.E.S. concept, we enable you to have a quick and clear overview about the variety of our single rig components.
A.C.E.S. derives from 4 different categories of our rig equipment: Advantage/Cross/Expert and Select.
From Advantage, the most favourable, robust beginner variant to Select, the high end full carbon series, you will find the right product depending on your personal skills, performance and budget.

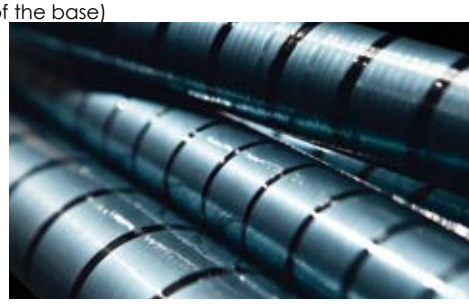
A.C.E.S. MAST LINE

As a sail manufacturer, we guarantee of course that all recommended Gun Sails masts perfectly fit our relevant sails and that the maximum performance can be reproduced. Rule of thumb: The more carbon percentage, the lighter the mast, the more performance, the higher the price.
From Advantage to Select, all our masts are produced in high specification Prepreg Carbon Technology, whereas the carbon percentages and the direction and configuration of the fibres mark the separation between the different models. This technology guarantees the best results in mast response, durability and an optimum of weight. Technical criteria such as length and stiffness (IMCS) are almost standardized with all mast providers, differences can be found in the bending curve. Thanks to our Constant Curve bending curve which is unmodified for years, you can on one hand also use older Gun Sails sail models with our current masts, and on the other hand, our masts are also compatible with most of the sails from other brands.

RDM vs SDM

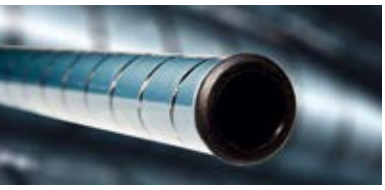
At our sail indications you can see for each sail, if you can use beside a SDM mast also an RDM mast. What are the differences?
RDM, Reduced Diameter Mast, also called skinny mast, indicates masts which have a reduced diameter (33 mm inner diameter of the base) and a nearly uniform profile from base to top.
SDM means Standard Diameter Mast and indicates masts with a standard diameter (48,5 mm inner diameter of the base) and a conical shape running from base to top.
RDM masts carry several advantages:
▲ Higher impact resistance due to higher wall thickness and reduced mast diameter
▲ Easier rigging, the skinny mast glides easier into the mast sleeve
▲ Better handling for waterstarts or in manoeuvres where you grab the mast
▲ In general an often lighter feeling although RDM masts are often heavier

In the meantime the majority of our customers choose for their wave and crossover sails an RDM mast.
For our camless flat water sails Stream and Rapid we can recommend an RDM mast only to certain sail sizes.
For further details, please check the relevant sail indications.
The RDM is not suitable for a use with the camber sails Sunray and Vector. These sail lines are designed exclusively for standard diameter masts and get their best performance with them.
The GS-R can only be used in the smaller sizes 5.0 and 5.6 sqm with a RDM, the 6.3 can be used with both mast types.



POLYAMIDE PROTECTIVE SKIN

Gun Sails masts are equipped with a Polyamide surface, which offer a significant improved protection against abrasion and scratches. Thanks to the special finish, the masts are even more resistant against UV and thermal impact. In addition to this, it provides the Gun Sails mast line with a unique look and an extraordinary durability.



UNIVERSAL TOP FITTING

Our masts are equipped with a universal top fitting. In this way, all of our masts can be used in sails of other brands which use a male pin system instead of a female top cap.

A.C.E.S. BOOM LINE

Also in our boom line you can choose from the most favourable allround model Advantage up to the full carbon boom Select out of 18 different models.
The 2015 booms have undergone some updates: New SL front end, revised tube diameter Square Tail and Wide Square Tail carbon rear ends and of course a new design. And completely new, a full carbon boom for the big slalom and formula sails.

ADVANTAGE

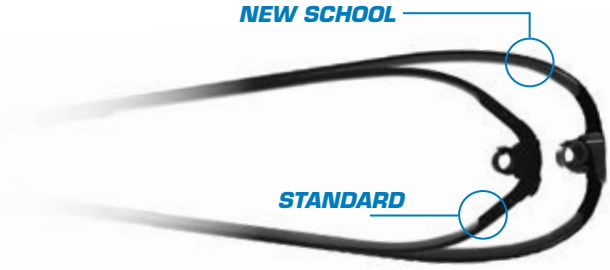
CROSS

V-CROSS

EXPERT

SELECT

STANDARD vs NEW SCHOOL

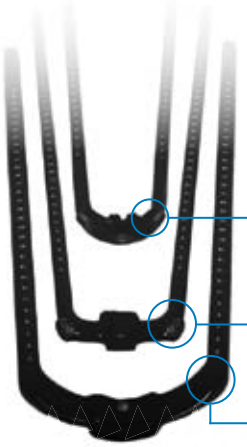


Curve comparison between the standard curve of Advantage and new school curve of Cross, Expert and Select booms. Monocoque front bow construction for more stiffness and new ergonomic curve for fatigue-free easy sailing.

NEW SL FRONT END

The new sleeve which is nearly 50% longer, accurately fits the mast. The larger protective surface has a perfect fit and is also more gentle to the mast due to the bigger and softer plastic inlay. The same also applies for the fully integrated removable RDM adapter. The hinge lock is easy to operate and can be handled without finger trapping. The front end is mounted axially and thus the boom can be set on the mast at any angle. The SL front end is part of all Cross, Expert and Select models.

NEW REAR END STYLES



Depending on model and length three differently shaped rear ends are in use.

ROUND TAIL
For all Advantage and Cross models as well as for the long variant of Expert boom (in carbon)

SQUARE TAIL
Carbon rear end for the short variant of Expert boom and the two short models of Select.

WIDE SQUARE TAIL
For the new Select slalom boom 180-240 and the Select slalom/formula model 230-290.

MASTS

A.C.E.S. CONCEPT

Which mast fits my sail? This question of often asked at the purchase of a new sail. The rule of thumb for masts is: the more carbon, the more performance, the higher the price.

2 YEARS WARRANTY

The high quality standard in material and workmanship, permanent tests in the laboratory as well as in our R&D loft in Tarifa guarantee a constant product quality and durability. So you can be very sure: Regardless of which model you opt for, you will receive a quality proven Gun Sails product with a 24-month-warranty.

FROM 119 €

ADVANTAGE

FEATURES

- ▲ Perfect allround characteristics
- ▲ Unbeatable price/performance ratio
- ▲ Ideal for beginners and intermediate sailors
- ▲ Versatile and robust. For wave, freemove or freeride use
- ▲ Great durability due to low carbon percentage
- ▲ Base with Polyamide surface
- ▲ **RDM masts will be delivered including adapter**

SELECT

FROM 489 €

NEW

New Carbon Square Tail rear end with loop to loop rope guide for sizes 140 and 160 cm

NEW

New Carbon Wide Square Tail rear end with rolls for sizes 180 and 230 cm

FEATURES

- ▲ Complete re-designed full carbon boom for highest demands on stiffness and performance
- ▲ Sizes 140 and 160 with slim 27.5 mm tube diameter and Square Tail rear end and loop to loop rope guide for wave, freestyle and freeride use.
- ▲ Sizes 180 and 230 with 29 mm tube diameter with slight V-shape which gets thicker towards the back to solid 34 mm and which holds the new Wide Square Tail rear end with rolls.
- ▲ Range of use of these sizes are with freerace, slalom and formula sails.
- ▲ The square shape of the rear end results in less tube bending and improves the stiffness. Thanks to the wider shape in the back area the sail has less contact to the inner boom side which protects the sail and reduces turbulences.
- ▲ Double pin lock length adjustment every 2 cm

SECURE LOCK SYSTEM

The patented Secure Lock System is also available as retro fit part and can be used with most harnesses of other brands.
It contains the hook plate and the buckle lock.

19,90€

Choose from 2 different sizes:
▲ Size M: length of the bar: 25 cm, for use with harnesses in size S and M
▲ Size L: length of the bar 30 cm, for harnesses in size L and XL

The buckle, which is made out of stainless steel, is fabricated to hold the spreader bar securely without any unwanted releasing. The buckle lock can be opened easily by pulling the release strap.

All Gun Sails harnesses are exclusively equipped with the patented Secure Lock System for securing the harness hook.

3D SHAPED BACK PLATE

PRO SEAT 79€

Ergonomic high performance seat harness
▲ Outstanding power transmission and excellent lumbar support from the 3D shaped back plate individually adjustable by straps, with neoprene-padded edge protection
▲ Adjustable, neoprene-covered step-through leg straps (not removable)
▲ With small Velcro key pocket on the outside
▲ Sizes: S, M, L, XL

EQUIPPED WITH SECURE LOCK SYSTEM

ON RIDE 75€

Classic Freeride seat harness with comfortable lumbar support
▲ 3D shaped back plate
▲ Medium positioned, neoprene-padded lumbar support, individually adjustable by strap
▲ Adjustable leg straps (removable)
▲ With small Velcro key pocket on the outside
▲ Sizes: S, M, L, XL

EQUIPPED WITH SECURE LOCK SYSTEM

BOLT 69€

Sporty, well-padded seat harness
▲ Low cut lumbar support for maximum freedom of movement
▲ Ergonomic and secure fit
▲ Adjustable leg straps (removable)
▲ With small Velcro key pocket on the outside
▲ Sizes: S, M, L, XL

EQUIPPED WITH SECURE LOCK SYSTEM

TRION 95 €

Cross over hip harness for freestyle and wave

- ▲ Low cut inner and outer 3D shape for maximum freedom of movement
- ▲ High shock-protection, material made out of water-repellent PU foam
- ▲ Soft neoprene padding at the edges for maximum comfort
- ▲ Integrated Belt System: integrated 360° kidney belt with elastic adjustment for perfect fit, prevents slipping
- ▲ Removable lumbar cushion for individual adjustment
- ▲ With small Velcro key pocket on the outside
- ▲ Sizes: S, M, L, XL

SAILBAG

MASTBAG

COMBIBAG

MASTBAG + SAILBAG

The Combibag provides a safe transit for sails and masts as a single unit. The mastbag can be securely fixed to the bottom of the sailbag with heavy duty clip fasteners.
The mastbag can be inserted in a 30 cm long pouch at the front of the sailbag. This provides the whole unit with more security and aerodynamics during transit. During longer trips and a higher speed, and for extra security we recommend you secure the whole combibag to your roof rack by passing the roof rack straps over the complete combibag and through the metal loops (stopping the combibag from sliding backwards or forwards) and around the roof rack.
Both bags can also be used separately.

▲ Length: 270 cm, Width: 35 cm, Height: 32 cm

99 €

SKY DEVIL

FROM 99 €

Delivered ready to fly with control bar and security hand leash

Included transportation bag

The new Sky Devil is an ideal trainer kite and your successful entry into the flying with kites with a control bar. The shape of the 2-line kite generates a lot of power and performance and enables also a re-start without helpers. The Sky Devil offers a constant draught and a stable direct flying performance.
The Sky Devil is delivered ready to fly with control bar, security hand leash and transportation bag.

Notice:
The Sky Devils are performance kites and no toys. We recommend a minimum age of 14 years for use.

TERMS OF TRADE

ORDERING
You can place orders via telephone, fax, mail or Internet. Please always quote your full name and address as well as the delivery address if it is different from your home address, and your telephone number in case of any question.
If you already have a customer number, please let us know as this will speed up the process,
and note it clearly. If you have any further question, please do not hesitate to contact us.

DELIVERY
The delivery will be effected by UPS or another reliable carrier appointed by us.

Deliveries abroad
We have standard flat rate freight charges for most of the European countries. You will find these charges on our website at the "Service" section (Shipping costs).
For deliveries to all other countries, we will charge you with the accruing freight costs. Should you need further information on this point, just send us an email stating your required articles and we will let you know the exact amount of freight costs.
Regarding deliveries in Non-EU countries such as Switzerland, Norway, etc., we will only charge you with the net price. The VAT of your country will be charged by UPS when delivering your parcel.
In case you receive your delivery in Germany, but then you export the goods in a Non-EU country, you have the possibility of receiving back the German VAT (19 %) by returning the original custom documents, which you will receive at the border when making the custom clearance, to us. Then we will make a money transfer to your credit card or bank account for the relevant amount.

Deliveries within Germany
Freight costs within Germany are € 15,00 for sails, masts, booms and other bulky items;
for smaller items up to 3 kg and neoprene articles: € 5,00.
Delivery will be free of charge for 2 sails or a total order amount of more than € 500,00.
For articles to be sent later due to unavailability, there will be no additional freight costs.
If you want to pay via Cash on Delivery, an extra fee of 5,00 Euro will be charged.

Damaged Goods
Please ensure that the receiver of the consignment inspects the outer packaging and the contents of all parcels before signing the carrier's delivery note.
If any part of your order is defective or missing, please reflect this on the carrier's note e.g. «damaged in transit» or «1 parcel only received» etc. and refuse delivery of the damaged parcel only and contact us immediately.
A signature of «received in good condition» will void any subsequent claim for damage in transit.

PAYMENT
The prices quoted in our Online Shop are including German VAT (19%).
For the payment of your online order, you can choose between payment via credit card (VISA or Mastercard, Cash on delivery and Payment in advance.
For a payment «Cash on delivery» a surcharge of € 15,00 will be priced and it is possible within EU countries (except Greece and the new EU-countries, within Norway and Switzerland.
In case of payment with credit card, we ask you to state the complete number of the card (16 numbers), the expiry date, the owner of the card and the card verification number, which is on the backside of your card in the signature field, the last three digits. We will charge the invoice amount before despatching the goods.

RETURN OF GOODS
Items that on reflection you feel are not right for you: You can return any item within 2 weeks after receipt and we will refund the selling price of the item on condition that the item is returned to us as originally packed, unused and undamaged.
The customer will bear the freight costs of the return of articles.
Items that show possible defects in materials and/or production processes:
Should the item show possible defects in materials or production processes, we ask you to notify us about this immediately, whereas probable transport damages should be notified immediately to the driver.
Please return these faulty goods back to us including a brief note describing the problem for us. Please contact us before returning bulky articles in order to find the most favourable way of sending it back.
Please understand we will not accept receipt of goods that are not prepaid carriage.
In case of a warranty repair or exchange, Gun Sails will bear the costs of the new delivery.

CHANGES
We reserve the right to make technical alterations for improvement of products and quality without prior notice. There could be minimal differences in colour due to the graphic representation on the screen and our catalogue or changes in production materials
